Security Manager  
Company Manager

## **Editions**

Workstation Edition  
Workgroup Edition  
Network Edition  
Enterprise Edition

## **The Solution**

The Integra Royalty Owner Solution provides oil and gas royalty owners and investors with an integrated suite of software components to manage the accounting and reporting needs of their organization. Integra is a configurable software system designed to meet the needs of individual royalty owners, royalty management companies, institutional investors and trusts. Integra's scalable database architecture is offered in four editions that can meet the needs of one to hundreds of concurrent users.

## **Solution Overview**

The integrated nature of the Integra solution components allows our clients to configure a software solution to meet their individual needs and to enhance their solution as needs change. Keyboard revenue check stub entry with purchaser-specific data entry screen configurations supports rapid entry and validation of line item revenue detail. The industry recognized Cdex Interface component provides an eCommerce alternative to manual heads-down data entry of revenue line item detail. Comprehensive property, general ledger and financial reporting components support company and property management information reporting needs. Integra's industry standard financial and depletion reporting provides your accounting staff and CPA firm with information in an easy to use format.
