

"The Integra system is the best and most cost effective solution for companies with more than 10 operated properties."

**Kyle Lewis, Controller, Xeric Oil & Gas, Midland**

"If we had known the depth of functionality and reporting available to us with the Integra Software system we would have implemented it two years earlier and never gone with the WolfePak system."

**Randall Capps, President, Xeric Oil & Gas, Midland**

"One of the most important virtues of Integra is the flexibility of the software. I mean by this, you can adapt the software to your business, your business is not a slave to the software. I've been a user for over 7 years and still learn something new each month. The system has never stood still. Improvements come often and I'm sure this will continue. The other great thing about Integra is their support staff. All are friendly, courteous, responsive and knowledgeable about the software. It is a great comfort to know help is but a phone call away. Any experienced oil & gas accountant would love Integra."

**Dick Powell, Accounting Manager, Texas Independent Exploration, Houston**

"Laguna Petroleum licensed the Integra Software in 1990 and through the years we have chosen to stay with Integra due to the superior quality of the software and long term working relationships with the Integra staff. This software allows us to manage, in house, all aspects of our oil and gas accounting. With only one accountant and one support staff member, we are able to process: JIB's, A/P, Revenue disbursing, Production (P1's, P2's, etc.), AFE's, Oil & Gas Sales, and Financials. The software is very user friendly and when support is needed, the staff is first rate."

**Sherry Milam, Accountant, Laguna Petroleum, Midland**

"I want to convey my gratitude for the prompt, efficient and courteous manner in which Integra handled the Oklahoma Senate Bill 1048 problem. It is a pleasure to work with the courteous professionals at Avatar who do what they promise."

**Hugh Tullos, President, Angel Exploration Co., Oklahoma City**

"At my previous employer, I was faced with some unusual production reporting situations that my co-workers thought we would have to deal with manually, but which the Integra Production system handled for us. Integra's training class and support staff was instrumental in my acquiring a depth of knowledge of the production module and getting me where I am today. Their prompt & friendly staff shines above the rest."

**Diane Kuykendall, Production Accountant, Matador Petroleum Corp., Midland.**

"I want to commend you on the ease in which our staff has been able to work with the Integra Software to meet client needs. Your staff could not have been more helpful when we needed that little bit of extra assistance. Thank You so much!"

**Janet Golay, Partner, Finley & Cook, Shawnee, Oklahoma**

"It has been so very refreshing working with the Integra Software and the support staff at Avatar. I cannot tell you how many times we have been in a situation where we had to deal with other groups that made every effort a chore. The Integra staff has been "The Best" by far that I have ever worked with. You guys are great!"

**T.J., Owner, D.K. Boyd Land & Cattle Company, Midland.**

"When the accounting group at Texas Independent changed from PetroComp to Integra, my staff came and thanked me for making their jobs so much faster and easier. As a result, you not only made me look smarter than I really am, but, we were able to reduce our accounting department staff requirements from seven people to three."

**Dick Powell, Accounting Manager, Texas Independent Exploration, Houston**

"The Integra system is by far the easiest and most trouble free application to install, upgrade and maintain of the 14 or so major application software packages that we use here at Pure Resources."

**Ronnie Covert, IT Analyst, Pure Resources, Midland**

"Four months into the Titan Resources merger deal with UnoCal, we are getting some traction under our tires and all UnoCal properties came under Titan Accounting. Almost overnight, we grew from 75 to 230 employees and went from 84 to 170 million barrels of proven oil reserves. Both accounting staffs have worked hard and thanks to them, the Integra Software and the Avatar staff, the change was invisible to the outside world. Royalty owners and anyone who was owed money have been paid without a hitch."

**Bill White, Chief Financial Officer, Pure Resources, Midland.**

"When Titan Resources began operating the Unocal properties in the Permian Basin, the decision to continue to use the Integra Software as our accounting solution was made. The cost to upgrade and maintain the Integra Energy Software System and the known efficiencies of data conversion into Integra compared with UnoCal's Oracle Energy System made the selection of Integra a no-brainer. The other solution providers we considered could not justify the investment in their system when you consider the price, features, functionality, and on-going maintenance of the Integra System. The Integra Energy Software System gathers all the information that we need and has the reliability and stability that we need. When we assumed operations of the Unocal properties, the Avatar support staff was able to convert the data from Oracle Energy in an efficient, timely and cost effective manner."

**John Benfatti, Controller, Pure Resources, Midland.**

"Using the Integra Software is like driving a good, reliable Chevrolet. The system is not overly complex, it will allow you to get your work done reliably and will help you do your work efficiently. The system has a very cost effective total cost of ownership and has the features we have come to expect in a quality petroleum industry software system. We rely on the Integra Energy Software and the Avatar staff to help us manage this growing business."

**Bill Morris, Manager, Financial Reporting, Pure Resources, Midland.**

"Having participated in the installation of four major accounting programs during my career, I have never dealt with anyone who was more knowledgeable about their product than your support staff representative. She was able to help us set up our data and answered all of our questions quickly and accurately. Her personal and professional attitude has made a lasting impression on everyone in our office."

**Le Gentry, Accountant, Big-D Companies, Midland.**

"Thanks you so much for making the transition to your Integra Windows product so easy. Integra is a great software program. None of our staff was really looking forward to the version change, but this has been very easy. When your staff told me that we could use our prior version programs if we got in a time crunch, that made all the difference in the world when we made our decision to go to the Integra product."

**Ginny McCarty, Accounting, GPII Energy, Midland.**

"I have used Integra software for 15+ years at various companies. By far, Integra is the best Oil & Gas Software out there. I am familiar with at least four other popular oil & gas software systems, hands down Integra is the most user friendly of any other oil & gas software I have seen. The General Ledger is clean and easy to analyze and the Property Comparative Reporting is outstanding. Their support staff is always there to help with questions. Over the years I have had the opportunity to work with start-up companies as well as companies that are switching software. The one time that I tried to use another company's product due to local support, I regretted it; so now I always recommend Integra. The implementation and support staff works with you to meet your individual company needs, with the software modules, with the cost and with your employees. Whether you are a small company or a larger organization, Integra will make any accountant's life easier."

**Debbie Holt, Accounting Manager, Palo Petroleum, Dallas.**

"Since we have upgraded to the new Integra windows version of Integra, I must say I really like the system even better than before. My boss also really likes the new product, especially the reporting. He is so please, he wants to license more applications."

**Angela Nash, Accountant, Robertson Resources, Midland.**
